

Information Sheet for Vendors

Your local repair shop needs your support!

They want to join in the efforts of independent auto repair shops in a grass roots effort that is sweeping the nation. Brakes for Breasts originated in 2011 and in 9 years has raised just over \$941,000. 100% of every **single penny raised goes directly to support research** for the Cleveland Clinic Breast Cancer Vaccine Fund.

This fundraiser offers **FREE** brake pads or shoes to the repair shops customers. The customer pays for labor and any other ancillary parts needed for the brake repair (rotors, calipers, hardware, etc.) The repair shop then donates 10% of each brake repair to the research for the Cleveland Clinic Breast Cancer Vaccine Fund.

How can you help?

Your repair shop needs a supplier that will provide the brake pads or shoes **FREE** to them for the month of October, will that be you?

Won't you join us in a legitimate effort to put the brakes on breast cancer? We have all been affected by this terrible disease in one way or another. Dr. Vincent Tuohy and his Team have been working on this vaccine for 13 years, and are now very close to bedside trials. Brakes for Breasts has been a huge facilitator, with 100% of every single penny going directly to research. No office buildings, no marketing teams, no huge salaries, in fact there are no paid personnel. Everything we have accomplished is with two volunteers and a budget of zero..

Laura Frank (repair shop owner) and Leigh Anne Best (repair shop marketer), simply put their heads together one evening and Brakes for Breasts was born. With only one month to plan the first year they got 5 local shops together and raised \$10,000. With more time to plan year to year it has exceeded their wildest dreams. The support of their independent fellow repair shops has been the foundation of success, along with the vendors who have supported them. The participating repair shops pay for their own fundraiser marketing to get the word out to their clients, and they also spread the word of Brakes for Breasts to fellow repair shop owners.

This fundraisers success is based on the fact that it is a win win for everybody involved!

The repair shop you support is committed to an exponential increase in your business for the month of October. Their commitment involves making certain that all the components (rotors, calipers, hardware) of that brake repair are ordered through your facility. If the vehicle needs additional repair (eg: tie rods, ball joints, shocks) they will also order those parts from you! In other words you are going to be their first call the entire month of October! The only exception would be lack of parts availability.

Some vendors are hesitant initially, but our experience has shown that once they support their local repair facility the first time, they never look back and have hopped on board every year since in October!

Words from Dr. Tuohy,

"Brakes for Breasts provides my helping hands, enabling the research to continue to further develop the vaccine and also explore potential other applications to ovarian and prostate cancer and perhaps a host of other diseases"

Look how we've grown!

2011

\$10,000 is raised by
5 Ohio Repair Shops

2012

\$32,848 is raised by
27 repair shops across
17 states

2013

\$66,499 is raised by
66 repair shops across
27 states

2014

\$115,236 is raised by
142 shops across
29 states

2015

\$141,868 is raised
by 174 shops across
32 states

2016

\$125,867 is raised
by 131 shops across
35 states

2017

\$114,389 is raised by
114 shops across
34 states

2018

\$141,061 is raised by
138 shops across
34 States and
2 Countries!

2019

\$194,160 is raised by
114 shops across
34 states

**LIFETIME TOTAL
\$941,931**

Quick Calculation

Assume the cost on a set of brake pads is \$25.00. Based on the 2017 Brakes for Breasts fundraiser, 114 repair shops participated. The average repair shop completed 17 brake jobs during the month of October.

\$25 x 17 brake jobs is \$425.00.

In the past some local suppliers have split this cost with the parts jobber, reducing each organizations cost to \$212.50.

We continuously seek national brake vendors to participate and be a National Sponsor of Brakes for Breasts. You may not have noticed, but Brakes for Breasts does not presently allow any sponsorship, as we are holding this exclusive opportunity open to a vendor who will support our repair shops on a national level. This would also be a great opportunity to open new doors in the month of October, and perhaps develop a lifetime relationship with that repair shop.

Additional Information

Looking for more information about Brakes for Breasts or Dr. Vincent Tuohy of the research for the Cleveland Clinic Breast Cancer Vaccine Fund?
